

First Time Ever In College Completion Rate

Each year the college identifies the students who are taking their first college courses after completing high school. All of these students who start in a fall semester are part of that fall's first time ever in college (FTEIC) cohort. In August of their third year we determine how many have completed an associate's degree or completed a certificate. The ratio of completers to the total number in the cohort is the completion rate presented below.

Cohort starting semester	Number of students in cohort	Completion of degree or certificate within 3 years	Rate
Fall 18	4033	741	18.4%
Fall 19	3931	733	18.6%
