

# MC CYBER LAB

## Cracking Passwords with Hashcat

**Speaker: Professor David Vargas**

Hashcat is the preferred password cracking utility due to its superior GPU password cracking support.

Topics will include:

- Where to find Hashcat
- How to install via Debian & Fedora/Red-Hat
- Differences in the six "Attack Modes"
- A comparison of Hashcat vs. John the Ripper

**Thursday, March 6, 12p**

**Germantown Campus HT230**

**or [zoom.us/j/92788499243](https://zoom.us/j/92788499243)**

**Attendees will receive related lab exercises to practice at home!**

**Some Professors may give extra credit for in person attendance!**
